COMMUNITY HEALTH INITIATIVE (CHI)

ABOUT THE PROJECTS

CHI Student Consulting Projects are experiential learning opportunities available to all University of Minnesota graduate and professional students from all schools and departments. Students work on specific projects that have been identified by local nonprofit organizations or businesses that work with public health issues. These projects attempt to solve a business need of the organization or address a health disparity in the community. Projects run September through December 2015 with each student contributing 60-80 hours to the project. Students are paid a stipend after project completion.

TYPES OF PROJECTS
